

Online database For **Lobbying Industry**

About Client

Client is providing congress's one-stop resource for information on lobbying and government relations. They provide online database of over 22,000 federal lobbyists, their firms and their clients (corporate and nonprofit) as well as online database of all congressional members and staffers with user-friendly reference guide to common ethical questions and concerns of congressional members and staffers. From current and former legislative relationships to lobbying compliance and business development tools, it brings all together for site users.

Business Requirement

Client is looking for the enhancement of business through online site. Old site database structure was not supporting to store more and more data i.e. all relevant information and it was required to improve user interface. The major concern was to upgrade the site phase wise which should not stop the online business/site even

Solution

We have developed solution of lobbyist.info that has all the detailed that is requested in the specs with the extensive search features, save search features. We are also maintaining the database related to the website. As seen from website screen-dump we made layout such easy like single search can search all the type of officials.

Microsoft Asp.net 2005, SQL server 2008, IIS 7, Cloud Hosted

Solution
